-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

This action is responsive to applicant's Amendment After Final filed September 27, 2005. After reconsideration and in view of the amendment, the finality of the Official Action is withdrawn in view of the newly discovered prior art to Baxter (US Patent 6,648,898).

### **New Grounds of Rejection**

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 45 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 45 recites the limitation "the rounded front end" in line 1. There is insufficient antecedent basis for this limitation in the claim.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 42 is rejected under 35 U.S.C. 102(e) as being anticipated by Baxter (US Patent 6,648,898). The patent to Baxter discloses the limitations as recited in claim 42 above as follow:

- a surgical tool capable of inserting a non-metal implant into a patient's body; Baxter is adapted for inserting a clip (implant) into a patient's body. surgical clips are metallic and non-metallic;
- a handle 22
- an elongated body 50;
- a clamp jaw (42, 44) having a blunt end;
- a clamp jaw operating element 48;
- a jaw lock linked to the clamp jaw (column 6, lines 7-10).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 44 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baxter in view Green et al (US Patent 5,395,381). The latter reference suggests tapered jaws having a blunt rounded front end. Green et al is silent as the radius of the

front end, however, such radius range would have been within the purview of one having ordinary skill in the art to modify Baxter's blunt ends to having the claimed radius so as to minimize damage tissue. Further the applicant has not shown any criticality for the claimed front-end radius.

***Allowable Subject Matter***

Claim 43 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 47-49 are allowable over the art of record.

***Response to Arguments***

Applicant's arguments with respect to claims 1-46 have been considered but are moot in view of the new ground(s) of rejection.
